

**CLARIFICATIONS**  
**RFP-GRC-2017-008**

Date: 14/11/2017

1. *In the BOQ you assume certain fixed quantities for the excavation in soil and in rock. In case that during the excavations the relevant quantities will be found as a percentage between soil and rock different than those in the BOQ, the quantity surveys and the payment certificates will correspond to the actual quantities?*

**Answer:**

The final quantities in the BoQ, will be certified and measured by UNHCR's technical team payment will be adjusted accordingly and in accordance with the mutually agreed contract.

2. *In RFP 2.4 Content of the technical offer. Paragraph B: understanding of the requirement services.*

*Could you please clarify the difference between:*

*I. a description of your organization experience in civil works and especially hydraulic pipe works (minimum 2 similar projects)*

*and*

*IV. an outline of recent experience or projects of similar nature (at least for the past five years).*

**Answer:**

The description of minimum 2 similar projects should be more detailed in terms of financial size of the projects as well as technical data. In the second case, simple outline of recent experience or projects of similar nature without mentioning any specific detail will be enough.

**Minutes of site visit held on 10<sup>th</sup> November 2017**

During the site visit, the participants had the change to familiarize with the location that the project will be initiated. The objective of the project is to connect the Agia Eleni with the main sewer network of DEIAI. Three main concerns were raised by the participants :

- Possibility of partial payments: *reference to paragraph 2.8 tender document “[...] Interim instalments may be subject to contract negotiation between IUNHCR and the awarded company following the agreed timetable in three phases.[...]”*
- Implementation of works and timeframe: *reference to paragraph 2.4.1 BIII of the tender document-“Analytical timetable for the implementation of the works”* The timeline shall be proposed by the bidder.
- The sewer pipe will be placed on the left of the national road, towards Eleousa.
